

IMPAQ International, LLC
Supervisory SAS Programmer Job Description

Location	City, State Zip	Post Date	Salary Range	Reports to
Headquarters	Columbia, MD 21044		Negotiable	Chief Operating Officer

Overview

IMPAQ International, located near Washington, D.C., is a woman-owned, dynamic, and growing social science research firm providing high-quality consulting and research services, including impact evaluations, policy analysis, and technical assistance to domestic and international government agencies. IMPAQ specializes in designing and implementing research projects to evaluate the effectiveness and cost/benefit of social programs.

Job Profile

IMPAQ is seeking a full-time Supervisory SAS Programmer. *Candidates must be* highly proficient in SAS programming. The ideal candidate will participate in all aspects of IMPAQ’s current domestic and international projects. Primary responsibilities include performing a variety of tasks related to SAS programming, data collection, data processing, quantitative and qualitative data analysis, report writing, and data manipulation.

Responsibilities

- Planning, directing, distributing, monitoring, assessing, and evaluating the work of a small team of SAS programmers; maintaining efficient team operations; handling administrative reports and details; and ensuring workload deadlines are met timely
- Supporting research efforts by reviewing statistical methodologies, recommending methodological best practices and implementing statistical analysis solutions
- Manipulating and managing data in SAS
- Performing advanced statistical analyses
- Creating customized, automated reports
- Creating presentation-quality data listings, summary tables, and figures
- Performing other related duties as assigned.

Qualifications

Education

- Undergraduate degree in a quantitative discipline (e.g., Economics, Computer Science, Statistics, or related field)

Knowledge and Experience

- Minimum of 5 or more years of experience in writing SAS programming code
- 3-5 years of non-academic work experience
- 1-3 years of supervisory or project leadership experience.
- Thorough knowledge of data processing management
- Thorough knowledge of SAS Basic, SAS/Stat, and SAS Macro

Skills

- Proficiency in Excel, Microsoft Office, and Windows
- Strong analytical and organizational skills
- Good oral and written communication skills
- Ability to learn quickly and work in a collaborative team environment

Desirable Skills

- Working knowledge of Unix and Visual Basic
- SAS Advanced Certification
- Master's degree
- Econometrics skills
- Working knowledge of STATA and SPSS
- Experience in leading or conducting statistical analyses, including: factor analysis, outlier analysis, regression analysis, and cluster analysis
- Familiarity with Federal government contracts and projects

Benefit Notes

IMPAQ offers a highly competitive benefit package including 401K savings and profit sharing plans; medical and dental health plans, holiday and sick leave benefits, life and short term disability insurance. IMPAQ offers a collegial work environment and is an Equal Opportunity Employer.

Application
