

## Who We Are

The **Center on Advancing Measurement and Assessment** at the American Institutes for Research<sup>®</sup> (AIR<sup>®</sup>) is a research and technical assistance (TA) center that brings together experts with a wide variety of disciplinary backgrounds and improve lives across AIR's education; workforce; and youth, family, and community development portfolios of the American Institutes for Research<sup>®</sup>.

## Key Topic Areas

- Whole-child development
- Standards and accountability systems
- Large-scale surveys and assessments
- Teaching and learning environments
- Personalized and competency-based learning
- Workforce development
- Measurement methodology
- Innovation in digital assessment
- Influence of artificial intelligence (AI) on measurement and assessment

## What We Do

**Develop and refine measures for research and technical assistance** | Our approaches enhance opportunities for all people to learn and thrive in school, the workplace, and society.

**Apply the best available evidence and innovations** | Our work draws on the most rigorous evidence and recent advances in measurement, artificial intelligence (AI), and related fields.

**Promote best practices to improve equity and fairness in research** | Our work employs best practices that promote validity, fairness, equity, and cultural responsiveness in assessment to contribute to a better and more equitable world.

**Create resources and guidance for practitioners** | We help practitioners understand and use measurement and methods in effective and efficient ways.

**Generate evidence to inform policymaking** | We support decision makers with actionable guidance across a range of areas, including accountability, educator development, and workforce preparation.

**Provide guidance to the research community** | We develop tools and resources that support measure development, validation, interpretation, and application for research projects.

## Our Partners

We work with a variety of partners, including:

- Local, state, and federal government agencies including school districts
- Postsecondary institutions
- Employers
- Developers of instructional materials and assessments
- Other research institutions
