Insights from Implementing the Enhanced MTM Model

Enhanced MTM Encounter Data

Leverages existing code sets

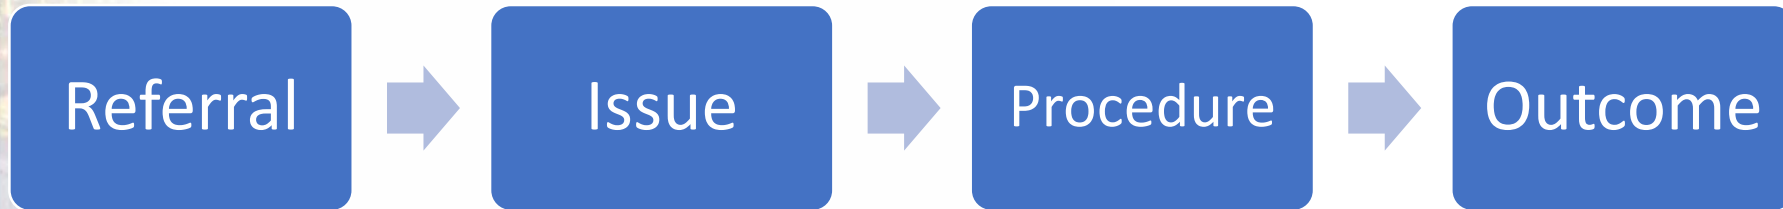

- Systematized Nomenclature of Medicine Clinical Terms® (SNOMED CT®)
- RxNorm Concept Unique Identifier (RXCUI)

Offers flexibility to capture all participating sponsors' Enhanced MTM approaches

- SNOMED CT starter value sets available, but plan sponsors not required to use particular SNOMED CT codes
- “ZZZZZ”: (“Other”) used when no existing SNOMED CT code identified

Enhanced MTM Encounter Data

- **Referral:** who notified and/or referred the beneficiary to receive enhanced MTM
- **Issue:** the beneficiary's medication therapy issue
- **Procedure:** what service or intervention the beneficiary received
- **Outcome:** what happened following an enhanced MTM procedure, including recommendations and assessment of patient health status
